OBJECTIVE

Develop a cutting-edge software in a team of software development/research professionals. I'm interested in fields where Mathematics meets Software Engineering, such as physical-based Computer Graphics, Computer Vision, Quantitative Finance, etc.

EDUCATION

Università della Svizzera italiana, Switzerland — October 2011 - current
Ph.D. in Computational Science

Novosibirsk State University, Russia — September 2004 - June 2009
Diploma in Mathematics and Computer Science

INDUSTRIAL EXPERIENCE

Data East, Russia — November 2008 - August 2011
Software Engineer

- Developed a service for full text and geo-spatial search (Java, SolrJ/Lucene, JavaScript)
- Designed and developed extensions for a geographic information system (ArcGIS, C#, WPF, C++, COM/ATL, ArcObjects)

Ledas, Russia — July 2007- May 2008
Software Engineer

- Developed computational cores for modern CAD systems
- Done a research in polygonal mesh construction and medial axis computation

TECHNICAL SKILLS

Solid knowledge in Object-Oriented design/architecture and C++
Programming language agnostic: used Python, Java, Matlab, C#, JavaScript
Experience in high-performance computation (MPI, CUDA) and profiling (NVProf, CrayPAT, Score-p, Rational Purify)
Multi-platform development experience (Linux, MacOS, Windows).

PUBLICATIONS

TEACHING

Universita della Svizzera italiana

- Teaching assistant, Algebra (undergraduate), 2012-2014
- Teaching assistant, Advanced Programming and Design (graduate), 2012-2014.

Novosibirsk State University

- Teaching assistant, Programming Fundamentals (undergraduate), 2010-2010
- Teaching assistant, Design Patterns (graduate), 2010-2011.

LANGUAGES

English - fluent
Russian - native
